MEDIA ADVISORY

American Gas Foundation to Release Study on Natural Gas End Use Technologies

Washington, D.C. – The American Gas Foundation (AGF) will hold a breakfast briefing for reporters to discuss the release of a new study, *Natural Gas End Use: A Vision for Today and the Future*. The briefing and study (completed by the Gas Technology Institute) will outline how new innovations in end use technologies can ensure that natural gas will be a vital and integral part of America's low-carbon future. Specifically, the briefing will focus on critical research, development and demonstration (RD&D) opportunities in natural gas residential and commercial sectors that can and should be capitalized upon in order to meet future energy needs while curbing greenhouse gas emissions.

When: Tuesday, September 22, 2009
9:30 a.m.

Where: American Gas Association offices
400 N. Capitol St., NW
4th floor
Washington, DC 20001

Speakers: Neil Leslie, P.E., Gas Technology Institute
Terry McCallister, president and COO, Washington Gas
Jay Copan, Executive Director (2009), American Gas Foundation

***Breakfast will be available.**

Founded in 1989, the AGF is a 501(c)(3) organization focused on being an independent source of information research and programs on energy and environmental issues that affect public policy, with a particular emphasis on natural gas. Overseen by a [board of trustees](#), the AGF has delivered numerous key public policy reports since 2000 and has sponsored executive level forums and events focusing on energy supply.
